

SchedulePay

Save time managing your cross-border payments by scheduling them in advance

Efficiency and foresight can be a challenge when dealing with frequent cross-border payments. Ascendant has already streamlined the payments process through our powerful tools which enable quick and easy payments processing, but we also know that some customers want the freedom to plan ahead.

HOW IT WORKS:
Scheduling a payment is as simple as entering your scheduled due date, your payee, the currency, and the amount. Once submitted, scheduled payments can be viewed in daily batches, and changed or removed as needed.

SchedulePay allows aPay users to schedule and submit batches of payments in advance, allowing for better forecasting and reporting.

WHY USE SCHEDULEPAY?

- Let us manage when payments are due: save time and cash flow by executing payments based on their due dates
- Our Payee Intelligence™ tool ensures the information you enter is correct the first time
- Single or dual-approvals are supported, allowing you to customize your process based on your own internal policies without sacrificing efficiency

For more information or to enable SchedulePay on your existing aPay account, contact your dealer or call toll free at 1-877-452-7185.
