

## Advanced Electronic Invoice Presentment and Payment (EIPP) and Responsive Design Highlight the Latest Release of FTNI's ETran Online Payment Portal Solution

*New Invoice Presentment and Payment Features as well as a Streamlined Design Help Companies Securely Accept, Process and Post One-time or Recurring Online ACH and Credit Card Payments.*

**OMAHA, Neb. (PRWeb) September 28, 2016** – Financial Transmission Network, Inc. (FTNI) announced today the launch of the newest version of its ETran online payment portal solution. Part of FTNI's award-winning ETran [integrated receivables](#) platform, the ETran online payment portal helps companies streamline the acceptance, processing and posting of one-time or recurring online ACH and Credit card payments.

Notable new enhancements to the ETran [online payment portal](#) include the ability to view summarized or original versions of invoices directly within the portal and the addition of a "Pay due" button allowing customers to conveniently select all currently due invoices for payment with a single click. Portal users will also benefit from a new, streamlined and responsive design, offering an optimized user experience across any device – PC, tablet or smartphone.

For those businesses with customers that have the need to make payments across multiple accounts or locations, the ETran online payment portal supports complex account and location grouping features. In these situations, approved users from the customer organization can make one-time or recurring ACH and/or credit card payments from a single access point.

Delivered in a fully-hosted model, the ETran online payment portal is hosted on FTNI's PCI-compliant, cloud-based infrastructure enabling customers to securely add, delete, modify and store payment information for convenient access. Readily white-labeled to reflect companies' brand elements, the ETran online payment portal minimizes internal support and IT burdens and offers customers a convenient, secure and easy-to-use portal that is available whenever and wherever they need to make a payment.

"As online payments become more pervasive across B2B and C2B receivables operations that have historically been anchored by check remittances, it's imperative that companies find new ways to de-silo their legacy AR operations and processes," said Chris Thompson, COO, FTNI. "Our latest enhancements to the ETran online payment portal deliver powerful new features to securely accept online payments while empowering enterprises to centralize AR operations on a single, unified platform."

Unlike a dashboard that only displays 'feeds' of transactions from disparate systems, ETran accepts, processes and posts any payment method ([check](#), single/recurring [ACH](#), [credit card](#), cash) via any payment channel (mailed-in, called-in, in-person, [online](#), [mobile](#)) on a single, secure, SaaS platform. ETran's easy-to-deploy modular design delivers robust EIPP capabilities across the platform and seamlessly integrates current business processes, bank and processor relationships, and back-office systems to deliver increased efficiencies and cost savings as a result of true straight through processing.

### **FTNI at 2016 IFDA Distribution Solutions Conference**
