## **FTNI Named a Leading Software and Technology Provider by *Food Logistics***

*FTNI's Integrated Receivables Hub, ETran, Helps Earn FTNI Its First Listing on the FL100+*

Omaha, Neb. December 29, 2015 – Financial Transmission Network, Inc. (FTNI), a leading provider of integrated receivables and straight through processing solutions, today announced the company has been recognized as a leading software and technology provider to the global food and beverage distribution industry by *Food Logistics*.

*Food Logistics*, the only publication dedicated exclusively to the global food and beverage supply chain, earlier this month announced the twelfth annual *FL100+* list, which appears in the November/December 2015 issue. This is the first time FTNI has appeared in the *FL100+*.

“FTNI is proud to be named to this prominent industry listing,” said Kurt Matis, president and CEO, FTNI. “ETran has proven to be a valuable asset for our clients and partners across the food and beverage industry, enabling them to significantly [streamline accounts receivables](#) and payment processing operations on a single platform. Because of ETran’s modular and highly-configurable nature, ETran, gives distributors the ability to tailor the solution to their unique business needs and automate AR processes and workflows, unlocking new levels of efficiencies and cost savings.”

ETran, FTNI’s flagship [integrated receivables](#) platform, is based in the cloud and ideal for businesses with one or many locations, payment channels, divisions or brands. Unlike traditional siloed receivables solutions, ETran is an easy-to-deploy modular application that seamlessly integrates any payment channel (mailed-in, called-in, in-person, mobile, online) and any payment type (check, credit/debit card, ACH, cash) in a single interface. It provides consolidated settlement, posting, reporting and reconciliation all in a direct, straight through processing solution.

“Developments in the software and technology sector are generating new opportunities for growers, food manufacturers, grocery retailers and the many logistics providers that support them,” notes Lara L. Sowinski, editor-in-chief at *Food Logistics*. “Moreover, cloud-based solutions and mobile connectivity are helping create tools that are more flexible, affordable and responsive, making software and technology even more valuable to those in the global food supply chain.”

Over 150 companies applied for this year’s *FL100+*, more than any prior year. The *FL100+* is designed to serve as a resource guide for the readers of *Food Logistics*. Companies who earned a spot on the *FL100+* list are featured in the November/December 2015 issue of *Food Logistics*, as well as online at [www.foodlogistics.com](http://www.foodlogistics.com).
