Payment Processing. Accelerated.

## ETran

TRUE INTEGRATED RECEIVABLES  
ON A SINGLE SAAS PLATFORM

## Powerful Payment Processing to Accelerate and Grow Your Business

Your customers' payment preferences are quickly evolving, but are your payment systems and processes ready to keep pace? Payment systems should be optimized to provide your customers with the flexibility of payment options that they increasingly demand, while also maximizing operational efficiencies and cost savings for your business.

Today's growing portfolio of available payment methods and channels has added new levels of complexity to payment processing — often requiring systems from multiple vendors, which can create duplicate work for your business. ETran from FTNI simplifies the acceptance, processing, posting and management of multiple payment methods across various payment channels, helping your business grow by streamlining operations while increasing convenience and flexibility for your customers.

## Simplicity and Ease of Use Drive Acceleration

FTNI's ETran solution is a flexible, cloud-based, integrated receivables processing platform and data warehouse ideal for businesses with one or many locations, payment channels, divisions or brands. ETran delivers a real-time, enterprise-wide view of all check, ACH, credit, debit, cash and mobile payments for superior receivables management.

ETran serves more than 18,000 users across a variety of industries:

- Insurance
- Distribution & Fulfillment
- Nonprofit
- Financial Services & Securities
- Waste Management
- Property Management
- Media
- ... and more

Unlike a dashboard that just brings together transactions from disparate systems, ETran supports the initiation, acceptance, processing and posting of all transactions from a single, unified platform. No changes to current business processes, bank and processor relationships, or other accounting software are required. And, ETran's secure Software-as-a-Service (SaaS) interface eliminates the burden of PCI DSS compliance — allowing your business to focus on its core competencies rather than ongoing IT and compliance efforts.

## Unlock the Power of Mobile Payments

ETran Mobile empowers your business with the ability to accept mobile remote deposit capture (RDC), ACH, credit or debit card payments securely, either via a stand-alone app, or by

integrating a secure payment SDK into your existing mobile application. All payments continue to leverage the ETran receivables platform, continuing the strategy that all receivables are processed and posted from a single platform.

That means more payments from more channels, more transactions, and more revenue to help grow your business and your bottom line.

## Popular Implementations

Payment Processing. Accelerated.

## ETran

TRUE INTEGRATED RECEIVABLES  
ON A SINGLE SAAS PLATFORM

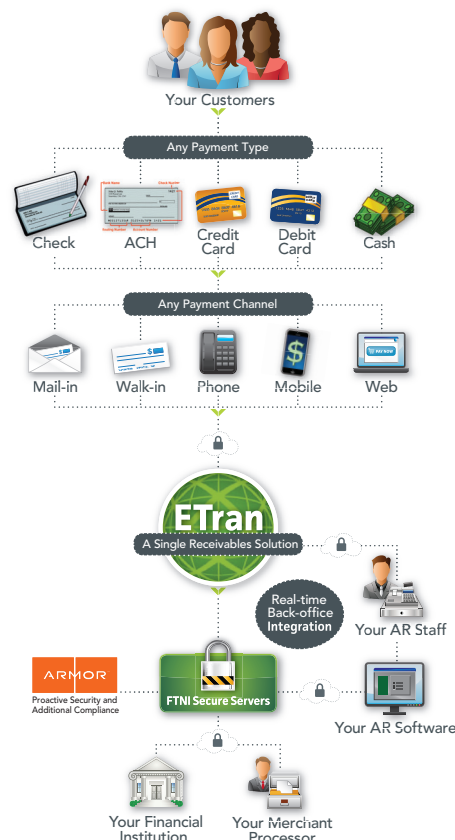

### Features

- ▶ Single, user-friendly interface that consolidates all payment types and channels:
  - Mailed-in, called-in, in-person, web, mobile, etc.
  - Check and remittance document scanning via Remote Deposit Capture (RDC) — up to 8.5" x 14"
  - Single and recurring credit card payments regardless of credit card processor
  - Single and recurring ACH payments, regardless of financial institution
  - Automated remittance document processing and reconciliation to improve data accuracy and speed payment and account correspondence
  - Mobile payments
  - Accept, process and post from a single platform
- ▶ Real-time integration with popular accounting and customer management software and systems
- ▶ Reduce the risk of fraud by proactively monitoring and suspending suspicious payments in real-time
- ▶ 30+ configurable reports — easily add more
- ▶ Deployed in fully redundant data center environment with no single point of failure

### Benefits

- ▶ Streamlined administration — all payment channels and methods processed and managed on a single platform
- ▶ Intuitive platform, requires little to no training
- ▶ SaaS, cloud-based technology accelerates deployment, support and upgrades
- ▶ Real-time, enterprise-wide view of all payment activity regardless of location or channel
- ▶ Automated enterprise-wide settlement, posting, reporting and reconciliation
- ▶ Leverage existing payment processes, bank and processor relationships, and accounting and customer management software and systems

### How ETran Works

- ▶ Robust, secure and PCI Level 1 certified platform eliminates compliance effort and expense
- ▶ Modular design enables new locations, users, payment channels and methods to be added in just a few clicks
- ▶ Flexible field mapping enables easy, complete accounting and customer management software integration
- ▶ Single-source for payment processing software and support
- ▶ Founders and employees of FTNI have more than 300 years of combined experience designing, deploying and supporting payment software solutions

### About FTNI

follow us online

Financial Transmission Network, Inc. (FTNI) accelerates the way businesses accept, process, post and manage payments. Processing millions of transactions monthly, FTNI's integrated receivables solution, ETran, accepts any payment method, via any payment channel — on a single, secure, cloud-based platform. Easily and affordably implemented, ETran minimizes setup, support and maintenance costs associated with receivables management and payment processing. ETran's modular design helps you efficiently and effectively address current AR needs while delivering a seamlessly scalable solution for future growth. Offering a real-time, enterprise view of all payments activity, ETran increases receivables oversight and delivers significant cost savings by streamlining operations and automating time-consuming manual processes.
