Online Payments Solutions: Convenient, Contactless

50% Adoption in 18 Months

After implementing FTNI's online payment solution, one distributor saw over 50% of their eligible customers enroll in the first 18 months.

Eliminating Manual Collections

Previously, a distributor had to send sales staff into the field to collect payments from past due customers. By offering online payments, they've kept sales staff focused on selling instead of chasing checks.

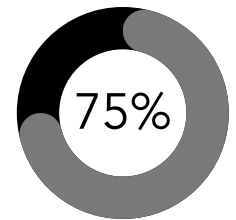

of FTNI's UniPro customers utilize Online Payment solutions.

Check Processing: Streamline Paper-based Receivables

From 5 Minutes to Less than 1 Minute Per Check

One distributor was spending over 5 minutes manually scanning and posting each check. With FTNI's Advanced Remote Deposit Capture (RDC) solution, this time has been reduced to less than 1 minute per check, freeing up time for AR staff to focus on higher-priority tasks.

of FTNI's UniPro customers utilize Advanced RDC solutions.

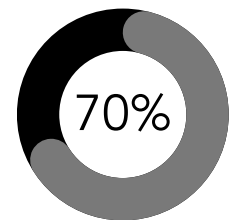

Mobile Payment Acceptance: Reduce DSO

Reduce Days Sales Outstanding

ETran's mobile solution decreases the time it takes AR departments to process and post payments by up to 80 percent, and reduces DSO by more than five days.

Cut Bank Float Time

A distributor with 100 drivers on the road used to experience delays in check deposits due to drivers' schedules. With FTNI's mobile app, they've cut bank float by at least one day, ensuring faster cash flow.

of FTNI's UniPro customers utilize Mobile Payment solutions.

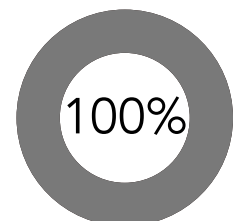

ETran: Scalable Solutions for Long-Term Growth

Achieved Positive ROI in Less Than One Year

By consolidating systems for check scanning and cash application, a distributor not only streamlined processes but also reduced headcount, resulting in a positive ROI within a year.

Scalable Software to Support Business Growth

Another distributor was able to bring on millions of dollars in new business without adding headcount, thanks to the scalability and efficiency of FTNI's software.

of FTNI's UniPro customers utilize ETran's back-office integration capabilities.
